

living wall™

Modular vertical garden planting kit

DIG's new living wall™ modular vertical garden system features a new concept allowing the quick positioning, mounting, and expansion of planted pots vertically. The system utilizes framed mounting brackets, which may be attached to any interior or exterior structure to transform a space into a green, growing environment.

- Easy to set up and maintain, either inside or outside, including on walls or balconies
- Unique design with simple self-lock position of the mounting bracket allows for quick and easy system installation
- A convenient, durable wall mounting bracket allows the pots to be easily hung and removed from the wall
- Offers the ability to add, remove, replant, and re-hang the pots quickly and easily
- Low maintenance system that has an open area between the pots and the wall, providing protection from moisture and preventing discoloration of the exposed wall
- Designed with water supply pipeline to run above the pots

Model	Description	Case	Weight
GLW08	LIVING WALL LARGE VERTICAL GARDEN KIT W/8 POTS (4 SMALL, 4 LARGE)	4	7
